

*your solution partner on the road
to high-tech...*

TRADA
ENERJİ ELEKTRONİK SANAYİ LTD.ŞTİ.

SOMEWHERE IN
THE FUTURE...

our professionalism is to bring ease, light and
ecology to life with high technologies

When you want to build your living standards for the future, your priority is to explore and explore new technologies, the only way to win a green world.

We are ready to guide you through your research and investments on this road to the future.

TRADA

*it's time for new breakthroughs!
and you take your place in the new world.*

Technology is the magic wand of today's world. It's deeply affecting and changing the world and our lives. There's no area he didn't enter, nothing he didn't turn. A man who is unfamiliar with technology, doomed to stay behind, to lose the race, to be forgotten... Trada Electronics, with 25 years of experience; LED lighting systems, wireless remote control, telemetry, from measuring and monitoring systems to education technology systems, from intelligent building management systems to professional sound, light and vision systems, security systems to the installation of solar and wind power plants, renewable energy systems, and many areas, it's been our best practice and knowledge to deliver the most advanced technological developments to our customers. Trada Electronics has made it a policy since its first day to offer the best technologies, the best consultancy, design, installation, operation and maintenance services to everyone on an individual and enterprise scale. All projects and commitments of Trada Electronics are the successful results of this principle. Come and take your place in the developing world. Don't get behind the technology!

TRADA

*we have the spirit of breakthrough!
that's why we have a wide range of activities.*

■ *LED lighting systems:*

- ➤ *Industry-saving lighting luminaires*
- ➤ *Street, road and high tower lighting systems*
- ➤ *In-building interior and exterior lighting systems*

■ *Key delivery project, commitment and business services:*

- *Wireless remote control, management, telemetry, measurement and monitoring systems*
- *Precision agricultural infrastructure components and automation systems*
- *Renewable energy systems*
- *Support for project, architectural design and management*
- *Solutions for software and hardware development*

TRADA

friend of your pouch and nature!

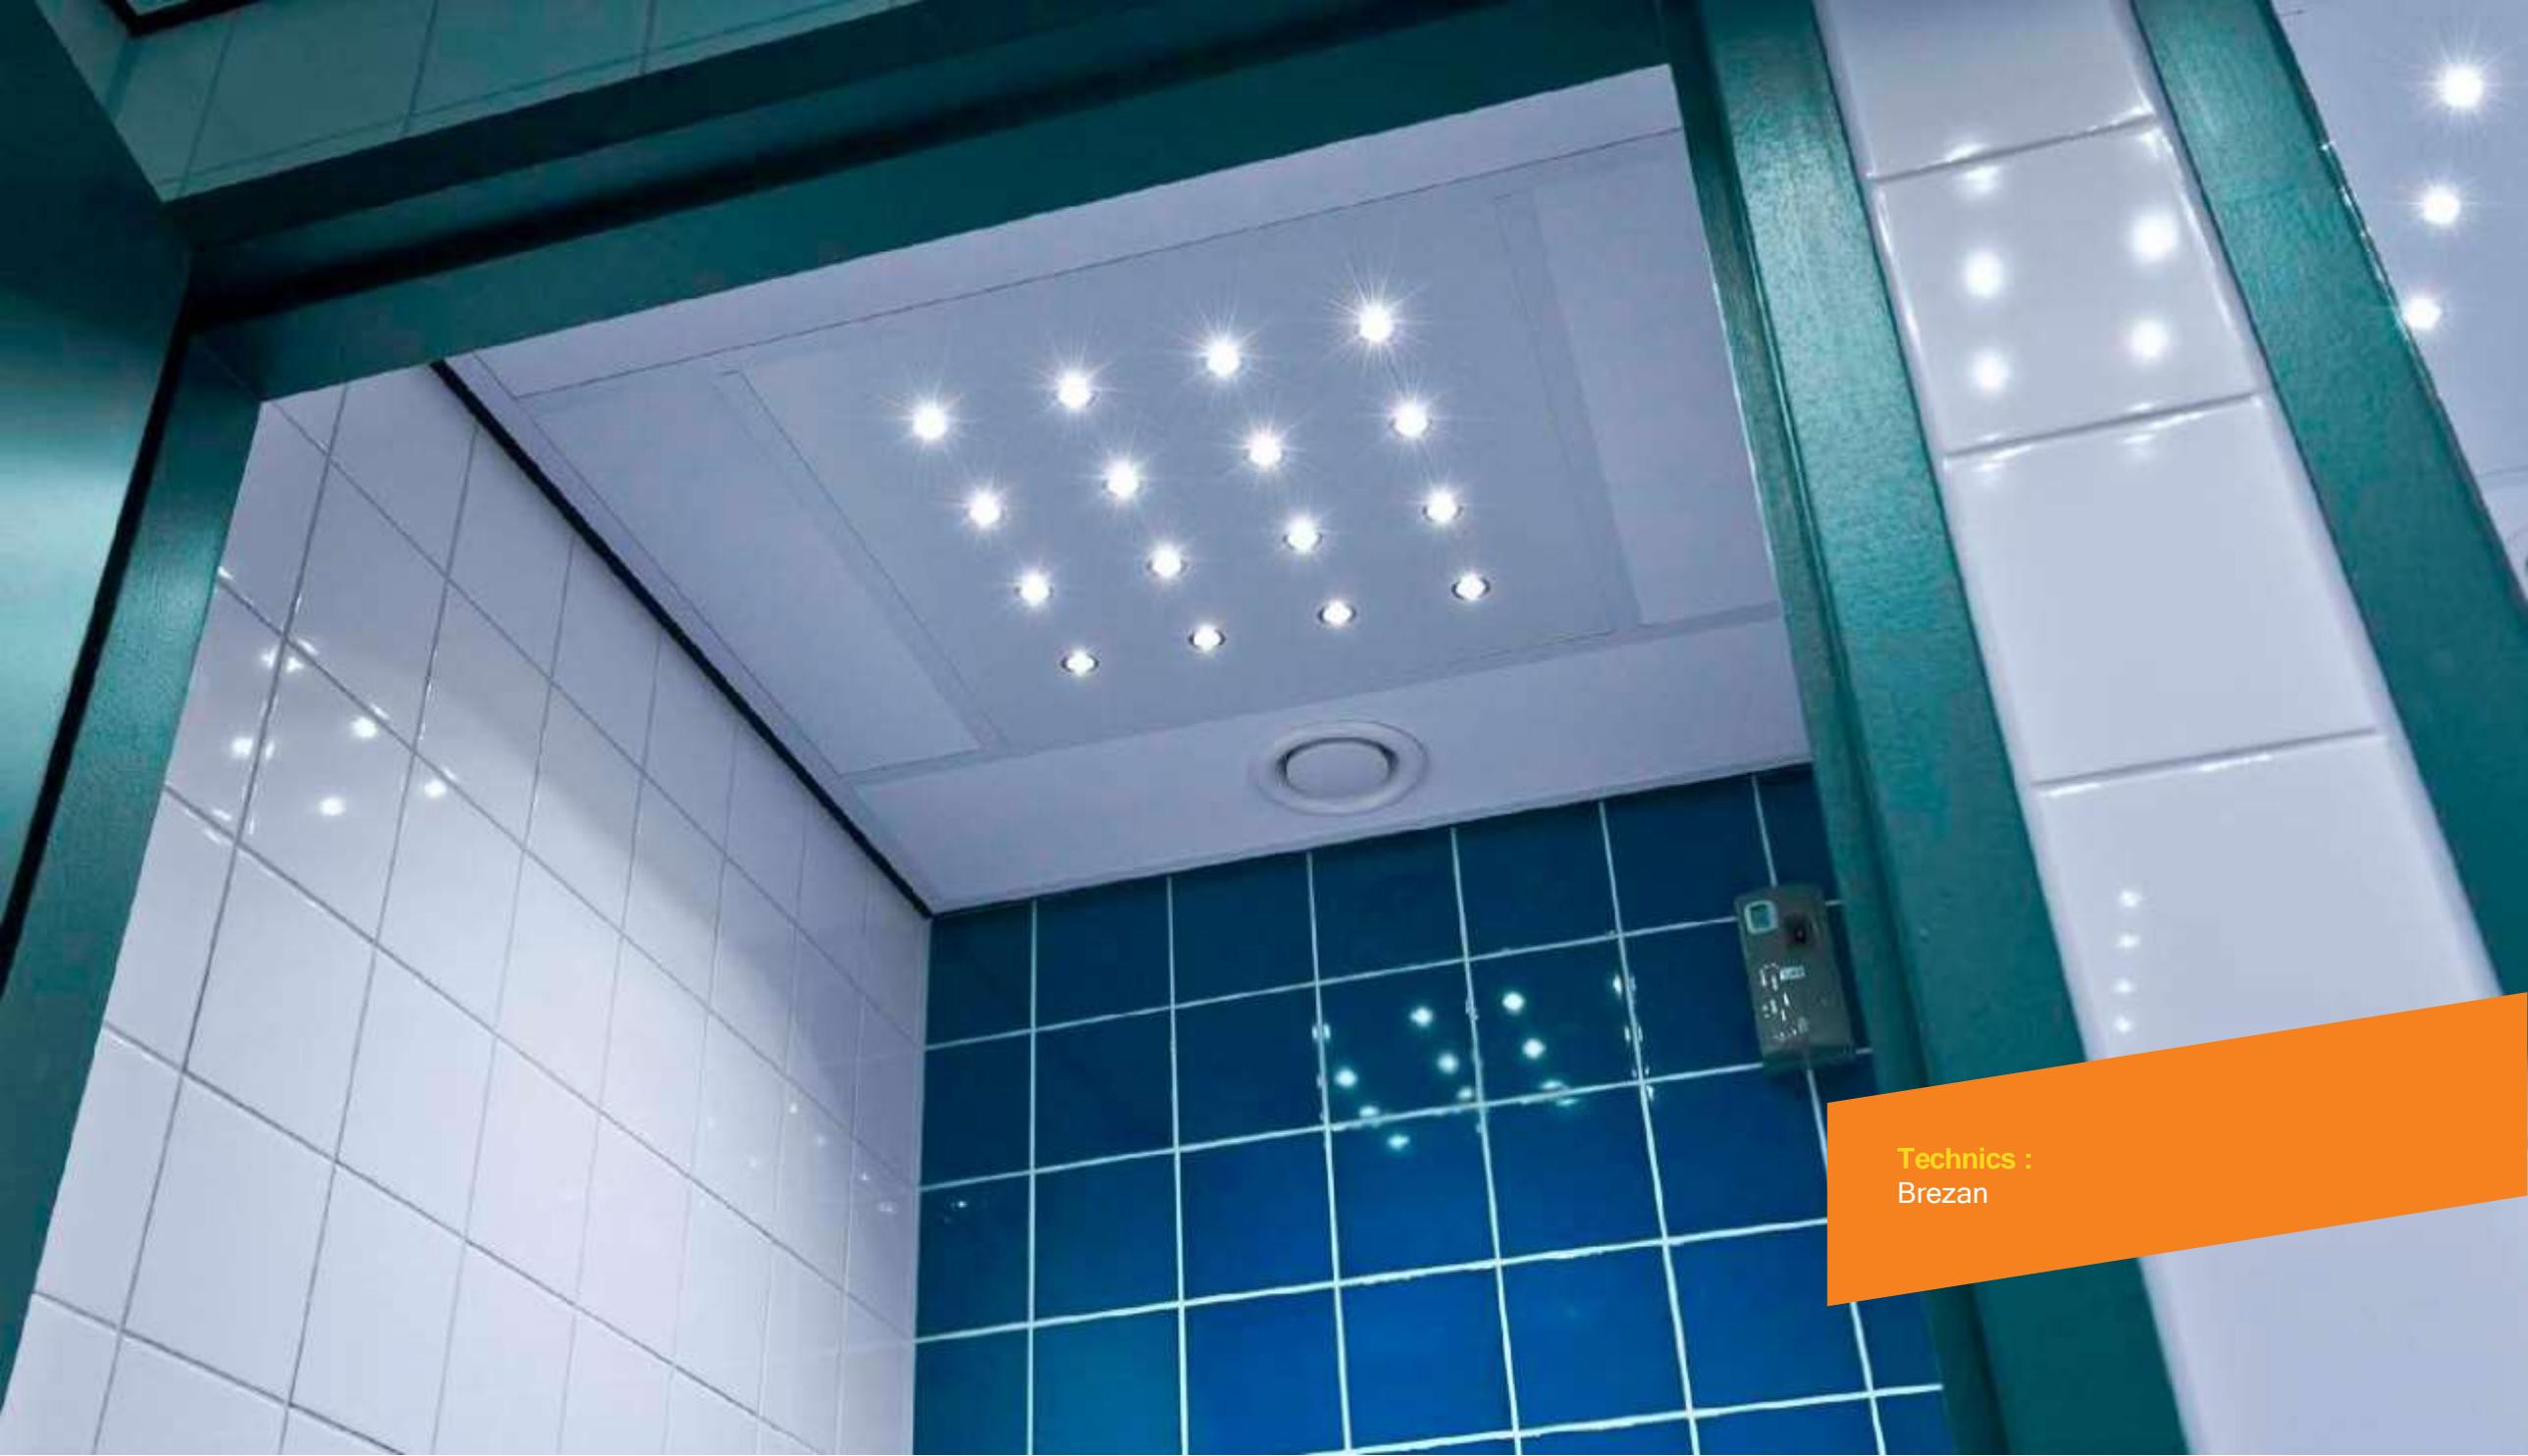

LED: New name of high technology and savings in lighting

LEDs, meaning light emitting diodes, are semiconductor circuit elements that convert electrical energy into light. For a long time, these diodes are used only in electronic circuits, and are also used in lighting due to high light efficiency. Small size, long-lasting, durable, economical, safe, Because of their eco-friendliness and many other benefits, LED's have quickly replaced traditional lighting solutions, becoming the indispensable products of today's world.

**Outdoor and indoor
products in LED lighting**

TRADA

There will be no more where the LED has not entered! Let the LED light up your life, too.

Use of LED lighting products:

Street, road, parking and environmental lighting,

Parking lot, bus station, terminal rooms,

Sports halls, supermarkets,

Factory, cold store, hazardous environments,

The tank, hangar, harbor, train stations,

Cultural and art center, museums,

Hotel, avm, business center, the lighting of the organized industrial zone,

Home, office, etc..it can be used in areas.

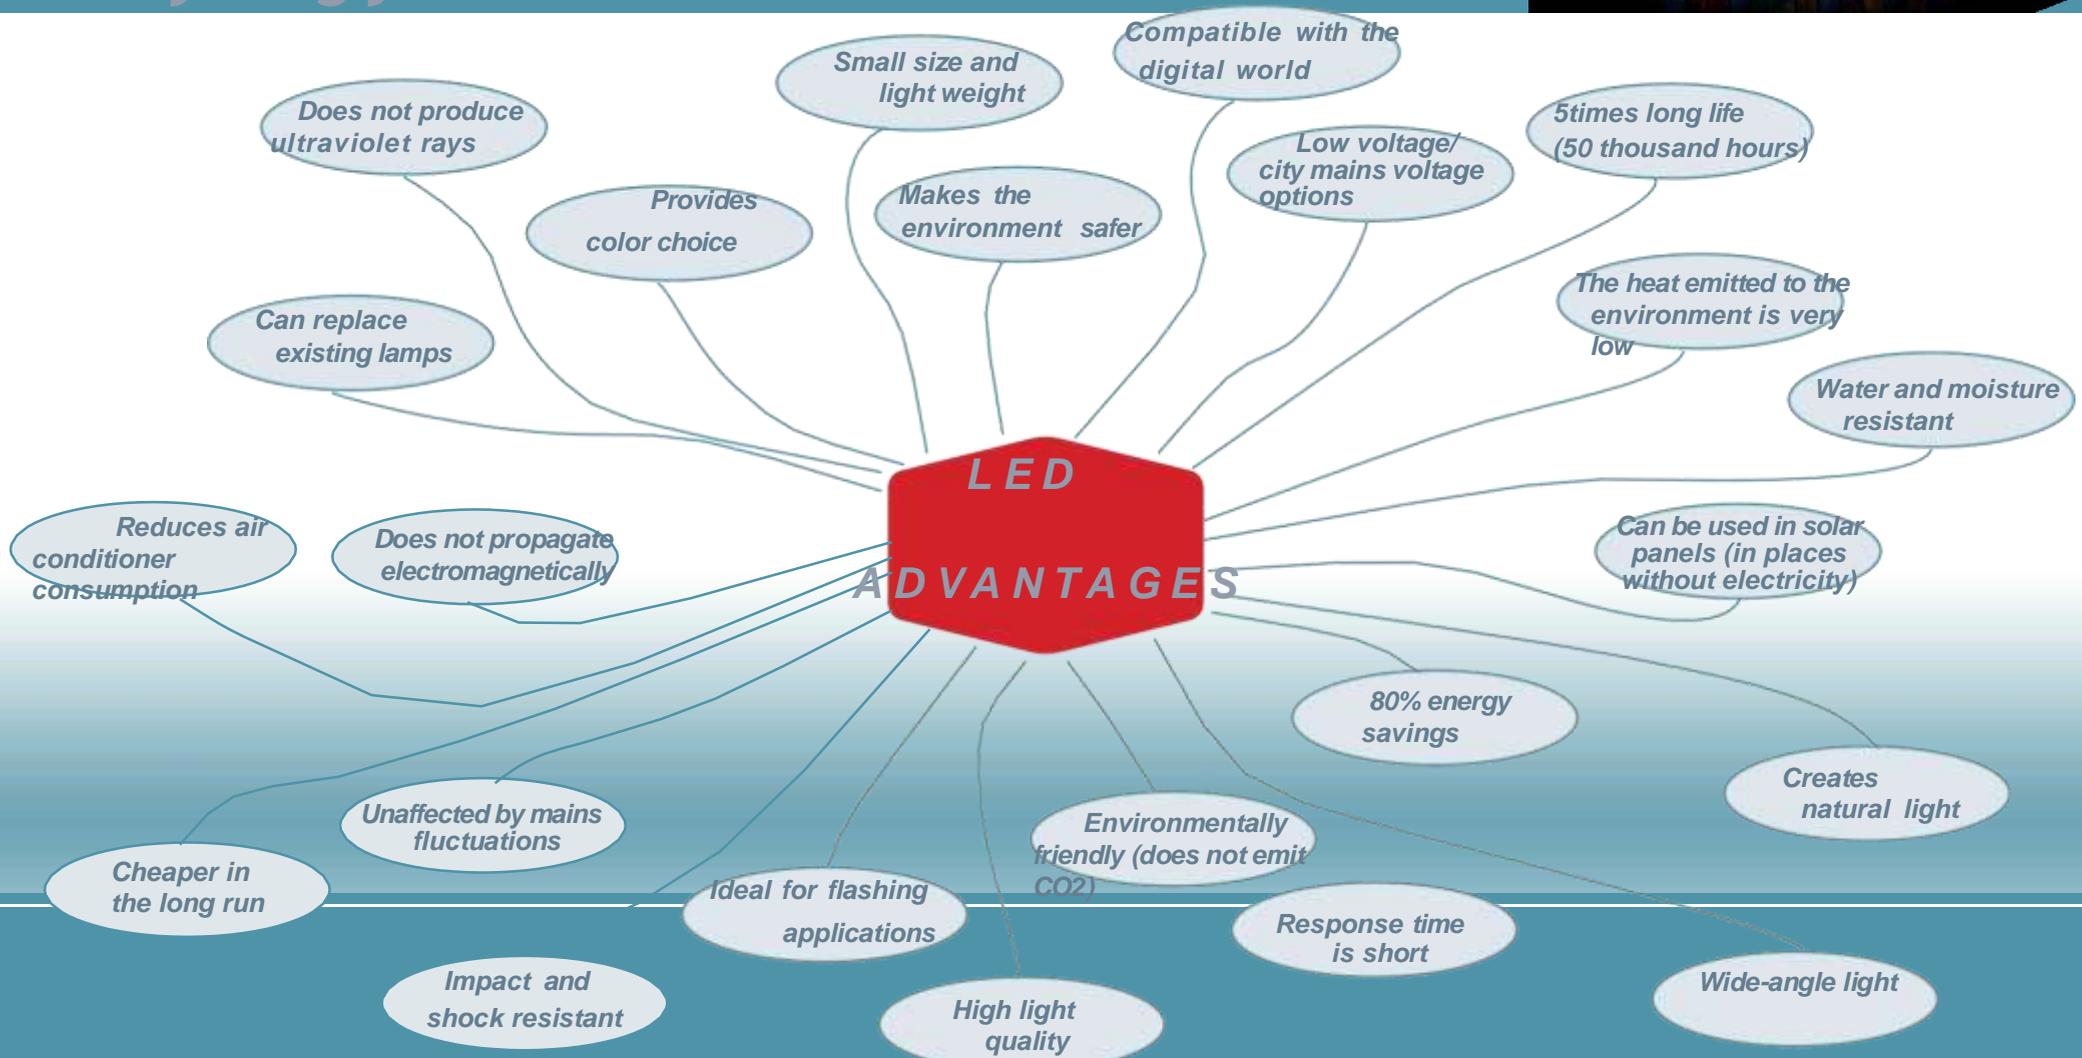

Perfect solutions that illuminate and color life

TRADA

LED revolution in lighting!
Don't let anything you don't know about the LED.

World Quality

Whether imported or domestic solutions

TRADA

TRADA: brief description of saving and functional LED luminaires.

Trada Elektronik produces industrial LED luminaires and LED spot-downlights under the registered TRADA brand for economical, long-lasting, functional LED lighting systems that will replace classical lighting systems in the near future, not only for residences, workplaces, industrial areas, but also for military institutions, maritime sector also responds to special customer needs and demands such as the machinery industry. All the products we produce and import are CE, TSE, DEKRA, KEMA, KEUR and ROHS certified, in international standards, high quality and long-lasting, and ISO 9001 quality management system is applied at every stage of our activities.

Instead of limiting our relations with our customers to product sales, we prefer to prepare and present comprehensive usage and savings reports in LED lighting projects, to transmit all relevant technical documents and to inform our customers with a detailed explanation about product features and uses. Our reports include many aspects such as savings-profit, the return period of the investment to be made.

Telemetry Systems

Telemetry systems are used in different sectors for very different purposes today. In line with the project information requested by the customer, remote measurement, control and access possibilities expand the usage areas of the telemetry system. Efficiency increase and control are provided with the telemetry remote control system.

Services we provide in telemetry systems:

- ➔ Software-project
- ➔ Infrastructure
- ➔ App
- ➔ Maintenance and operation

Where telemetry systems are used:

- ➔ In the fields of agriculture and animal husbandry

Telemetry systems are used in many projects such as temperature control of greenhouses, temperature and humidity control of the environment where live animals are located.

- ➔ Manufacturing sector and greenhouse applications

Telemetry systems are used in the control of all production areas.

- ➔ Remote monitoring and electricity meter reading

All activities of power plants can be monitored with the telemetry system.
